

## **Drug & Alcohol Abuse Prevention Policy**

Reviewed and Updated April 23, 2024

### **STANDARDS OF CONDUCT AND ENFORCEMENT**

Creative Images Institute of Cosmetology does not permit on its premises, or at any activity which it sponsors, the possession, use, or distribution of any alcoholic beverage or any illicit drug by any student or co-worker. Creative Images Institute of Cosmetology shall, within the scope of applicable federal and state due process requirements, take such administrative or disciplinary actions as appropriate.

For a student, the disciplinary action may include, and not be limited to, withdrawal. For a co-worker, such administrative or disciplinary action may include, and not be limited to, progressive communication, separation of employment, and requirement that the co-worker participate in and/or successfully complete an appropriate program. Any client engaging in any act prohibited by this policy shall be called upon to immediately desist from such behavior. If any co-worker, student, visitor or client shall engage in any behavior prohibited by this policy which is also a violation of federal, state, or local law or ordinance, that co-worker, student, visitor or client shall be subject to referral to law enforcement officials.

### **FEDERAL, STATE, AND LOCAL PENALTIES**

Ohio law prohibits illicit selling, cultivating, manufacturing, or otherwise trafficking in controlled substances, including cocaine, heroin, amphetamines, knowingly or recklessly furnishing them to a minor, and administering them to any person by force, threat, or deception with the intent to cause serious harm. These offenses are felonies. The law also prohibits knowingly obtaining, possessing, or using a controlled substance and permitting drug abuse on one's premises or in one's vehicle. These offenses may be either felonies or misdemeanors. The law further prohibits obtaining, possessing, or using hypodermics for unlawful administration of drugs and the sale to juveniles of paraphernalia for use with marijuana. These offenses are misdemeanors.

Federal law forbids the illegal possession of and trafficking in controlled substances. A person convicted for the first time of possessing a controlled substance, other than crack cocaine, may be sentenced to up to one year in prison and fined between \$1,000 and \$100,000. A second conviction carries a prison term of up to two years and a fine of up to \$250,000. Subsequent convictions carry prison terms of up to three years and fines of up to \$250,000. Imprisonment for 5-20 years and fines of up to \$250,000 apply to persons possessing more than five grams of crack cocaine on the first conviction, three grams on the second, and one gram on subsequent convictions. In addition to the above sanctions, a person

convicted of possessing a controlled substance may be punished for forfeiture of property used to possess or facilitate possession, if the offense is punishable by more than one year in prison, forfeiture of any conveyance used to transport or conceal a controlled substance, denial of federal benefits, such as student loans, for up to five years, ineligibility to receive or purchase a firearm, and a civil penalty of up to \$10,000.

### **Ohio Drug Possession Laws at a Glance**

#### **Statutes and Definitions**

Ohio Revised Code Section 2925.11 (Drug possession)

Ohio Revised Code Section 3719.41 (Controlled substance schedules)

**Possession of drugs:** If the possessor has Schedule III, IV, or V controlled drug substances, then he or she is guilty of drug possession.

**Aggravated possession of drugs:** If the possessor has Schedule I or Schedule II drugs (with the exception of marijuana, heroin, cocaine, LSD, and others specified in the statute), then he or she is guilty of aggravated possession of drugs.

#### **Penalties and Sentencing**

The penalties will vary based on the type of drug involved and the bulk amount.

The following is a general example of penalties for drug possession:

Less than bulk amount: misdemeanor in the first degree; up to 180 days in jail, a fine of up to \$1000, or both; For second and subsequent offenders: felony in the fifth degree; a 6 month (minimum), 12 month (maximum) jail term, up to \$2,500 in fines, or both.

Bulk amount or more, but less than five times the bulk amount: felony in the fourth degree; at least 9 months in jail, fines up to \$5000, or both.

Drug cultivation or manufacturing: Ohio Revised Code Section 2925.04

Corrupting another with drugs: Ohio Revised Code Section 2925.02

#### **Possession of Drugs**

Possession of controlled substances is illegal in Ohio under Ohio Revised Code Section 2925.11. The penalties vary based on:

The type of drug (schedules I-V)

The amount possessed

Location (e.g. near a school)

Prior drug convictions

Possession can be a misdemeanor or felony depending on the circumstances.

### **Penalties**

Felony drug convictions in Ohio carry these sentencing ranges:

1st degree felony: 3-11 years in prison, up to \$20,000 fine

2nd degree felony: 2-8 years in prison, up to \$15,000 fine

3rd degree felony: 1-5 years in prison, up to \$10,000 fine

4th degree felony: 6-18 months in prison, up to \$5,000 fine

5th degree felony: 6-12 months in prison, up to \$2,500 fine

**Other consequences may include driver's license suspension, probation and difficulties finding employment. Those convicted of drug trafficking may also face asset forfeiture.**

Ohio law provides for mandatory fines, which must be at least \$500, and possible imprisonment of any person who sells or furnishes beer or intoxicating liquor to an underage person or who buys beer or liquor for an underage person in violation of the law. Persons found knowingly to allow underage persons to possess and/or consume alcoholic beverages on their premises are guilty of a misdemeanor.

With regard to beer and intoxicating liquor, Ohio law provides that a person under 21 years of age who orders, pays for, attempts to purchase, possesses, or consumes beer or liquor, or furnishes false information to affect a purchase, commits a misdemeanor. Ohio law prohibits the possession of beer or liquor which was not lawfully purchased, and a court may order that any place where beer or liquor is unlawfully sold not be occupied for one year, or that the owner or occupant of the premises be required to furnish a surety bond of \$1,000 to \$5,000. Ohio law requires the mandatory suspension of an individual's license from six months to five years for violation of the Controlled Substance Act.

### **HEALTH RISKS**

Illicit drugs can cause the following symptoms to occur in the user: hallucinations, confusion, loss of coordination, irrational behavior, lethargy, apathy, lowered resistance to other diseases such as hepatitis, exhaustion, depression, paranoia, psychosis, panic, tolerance, flashbacks, physical and psychological dependence, suicidal depression, heart problems, infections, malnutrition, damage to lungs, brain, liver and bone marrow, convulsions, respiratory paralysis, coma and death. In addition, withdrawal from drug use may be very painful. Smoking may cause destruction of nasal membranes and lung lesions. Depressants taken with alcohol are very dangerous. Illegal drugs can cause birth defects in a user's unborn child(ren).

Effects from specific, illicit drugs:

- **Cocaine:** Highly addictive, cocaine is involved in nearly one in five overdose deaths; its health effects include asthma, bowel decay, and increased risk of HIV.
- **Methamphetamine (Meth):** Meth causes [devastating health effects](#), such as
  - Increased blood pressure and body temperature
  - Faster breathing
  - Rapid or irregular heartbeat
  - Loss of appetite, disturbed sleep patterns, or nausea
  - Erratic, aggressive, irritable, or violent behavior
  - Permanent damage to the heart and brain
  - High blood pressure leading to heart attacks, strokes, and death
  - Liver, kidney, and lung damage
  - Anxiety, confusion, and insomnia
  - Paranoia, hallucinations, mood disturbances, delusions, or violent behavior (psychotic symptoms can sometimes last for months or years after meth use)
  - Intense itching, causing skin sores from scratching
  - Premature osteoporosis
  - Severe dental problems
  - and sometimes death, even on the first try. Meth speeds up the body's systems to dangerous levels. Chronic users experience anxiety, confusion, insomnia, paranoia, aggression, and more.
- **Prescription and illicit opioids:** Highly addictive, the substances are the top cause of overdose deaths; health effects include confusion, nausea, constipation, coma, and brain damage.
- **Marijuana:** Even though it is legal in many states, studies link marijuana use to [various negative outcomes](#), such as:
  - **Brain health:** Marijuana can cause permanent IQ loss of as much as 8 points when people start using it at a young age. These IQ points do not come back, even after quitting marijuana.
  - **Mental health:** Studies link marijuana use to depression, anxiety, suicide planning, and psychotic episodes. It is not known, however, if marijuana use is the cause of these conditions.

## Drug & Alcohol Abuse Prevention Policy

Reviewed and Updated April 23, 2024

- **Athletic Performance:** Research shows that marijuana affects timing, movement, and coordination, which can harm athletic performance.
- **Driving:** People who drive under the influence of marijuana can experience dangerous effects: slower reactions, lane weaving, decreased coordination, and difficulty reacting to signals and sounds on the road.
- **Baby's health and development:** [Marijuana use during pregnancy](#) may cause fetal growth restriction, premature birth, stillbirth, and problems with brain development, resulting in hyperactivity and poor cognitive function. Tetrahydrocannabinol (THC) and other chemicals from marijuana can also be passed from a mother to her baby through breast milk, further impacting a child's healthy development.
- **Daily life:** Using marijuana can affect performance and how well people do in life. Research shows that people who use marijuana are more likely to have relationship problems, worse educational outcomes, lower career achievement, and reduced life satisfaction.

Alcohol can cause health problems in the user such as cirrhosis of the liver, cancer of the oral cavity, stomach and esophagus damage, pancreatitis, nausea, digestive difficulty, heart disease, malnutrition, psychological disorders, gynecological and sex problems, poor vision, memory loss, brain damage, and loss of coordination and sensation. In addition, alcohol consumption by a pregnant woman can have an adverse effect on the fetus and cause birth defects such as physical and mental growth deficiencies, abnormalities of eyes and lips and behavioral problems.
